HYDRA NEXUS PUTS YOU IN COMPLETE CONTROL

Monitor
View, analyse and manage your charging network with freedom

Optimise
Make smart decisions for your network based on real time analytics

Monetise
Optimise your networks profitability with our simple to use tariff tool

⚡	**Flexible and Powerful**	Private, Commercial, Public and Fleet Charging Solutions. Start with one chargepoint and build up to a complete network, all within one account.
£	**Fully Customisable Tariffs**	Determine the price drivers pay for public charging, you are in control of charging tariffs based on energy cost, peak hours, driver group and session length
£££	**Flexible Fee Structures**	Incorporate the cost of your network overheads to get a true representation of revenue generated and network management costs
🌐	**Remote Monitoring**	Monitor your network with an easy to read dashboard fed with real-time network data. Our cloud based platform gives you full visibility of your entire charging network and is accessible anytime anywhere
📱	**Tiered Access Accounts**	Multi level authorisation for user access across your organisation: Free-to-charge, pay-to-charge or BIK (benefit in kind). Also allows you to charge for public use (if required) to maximise revenue.

	Dynamic Load Balancing	Maximise your power output across each local network using the load management tools within Hydra Nexus
	Plug'n'Charge	Allow users to simply plug in and start charging with no requirement for payment or app
	Smart Reporting	Nexus gives you real-time, historical and analytical data allowing you to monitor ROI and plan future expansion. Revenue and usage data is exportable for accounting use or BIK calculations.
	Smart Maintenance	Automatic maintenance response notifications and fault reporting with automatic over-the-air updates
	Fleet Management	RFID cards can be issued to grant access to charging and monitor usage across entire workforce or selected staff members
